Sub: Service letter for Mr. Satish Reddy Budati

Respected Sir/ Madam,

This letter has been prepared to inform you that Mr. Satish Reddy Budati worked as a Software Quality Assurance analyst for the period of 10/01/2021- 07/29/2022 on full time basis. He worked on an average minimum of 40 hours each week. His compensation is approximately USD \$99,999.96 per annum.

His job duties performed during the employment are as below:

- Work on assigned projects under the supervision of an architect, who will manage and control the deliverables by providing specific instructions on required tasks and expected results.
- Design QA artifacts like test plans, test scenarios & test cases in test rail which is a web test case management tool and automate them using jump framework.
- Develop test plans and test cases based on requirements provided and peer review test cases developed by the team.
- Write quality automation code with Jump framework and Fathom, test and debug.
- Analyze the software features with the team and execute tests on features. Create automated test cases in partnership with developers and Product Managers in an agile environment. Shape and verify the nature of the code in test.
- Review product and feature design with development team and business system analysts to build regression and acceptance test scenarios.
- Develop functional automated tests in Java and/or Ruby. Jump fathom frameworks are used in developing automated tests which internally uses ruby scripting.
- Update test plan and test cases periodically to manage changes in requirements.
- Integrate automation scripts written in Jump framework with CI tools – GIT, Jenkins, ANT etc.
- Diagnose problems and report bugs and enhancements to the development team.
- Participate in daily, weekly meetings and technical reviews. Prepare reports showing the testing efforts.
- Involved in Jump and Fathom Frameworks enhancements and testing based on latest software available.
